Heater and defroster for your Comfort

No long waiting for the engine to warm up the heater, gives almost instant heat when the switch is turned on. The fuel for operating the heater is taken from the gasoline tank of the car. The gasoline consumption to operate the heater is a very small amount per hour. The amount of heat desired can be controlled by the temperature control knob. A highly efficient operating heater and defroster.

Chart shows how almost instant heat is obtained when switch is turned on.
